

Virtual Engagement Session Feedback

Option 1 Feedback: 100% Park Space	Option 2 Feedback: 60% Park Space + 40% Housing Development	Option 3 Feedback: 40% Park Space + 60% Housing Development	Any additional thoughts, comments or concerns?
Best option.	No, thanks.	NO. Thanks.	
This is my favorite option, hoping to see a fenced in dog area	Dont mind this if it's a senior community	No to this, it takes away to much of the green space	Try and link the Nancy parkland this together to split up areas if need be there so much empty space at Nancy that could be used I'm fine with option 2 if Nancy park get more added to it
Best option. Obviously there needs to be more detail (I'm hoping more than one bench for example). Would like to see the financials involved for creation and maintenance.	Best second option. Only if it means senior housing to keep Salmon River residents in the community.	Least favourable. Is only the option if it means not using the affordable housing option.	I believe the survey was not presented well. It became slanted due to being forced to pick housing options.
	My husband and I have bin walking here for 51 years several times a day. Where you are placing the buildings are the trails multi people are still using every day.as we meet almost everyone using the trails. The land where the soccer field use to be up behind the school and the trail there would give you a great place for building and still has treed trails on it (these trails aren't used every day like the one on the right that is busy every day and still used by many people and pets. Sorry but this is only my thoughts. Also what and how are they going to do police ing. Everyday we pick up garbage and put it in the bin also there has bin bags of needles that were laying in the ditch by the road block	The best option	The natural trails on the right is the best thing of the whole property. Just my opinion. As I mentioned we have been walking there and around the school for 50 + years. Living beside the property all I could wish for is not to waste the property and that the future generations will be able to have and appreciate it.
I really think this is the best option, love the idea. I live in Truro but grew up in Salmon River and went to school there. I might not have a voice in this but option 1 is my choice, thank you			
This should be the option we support as a county. There are plenty of other places to build more high end housing. As a community a park makes much more sense to support recreation and outdoor activities.	No. We have lots of land in other areas for housing.	No. Lots of lots available in many other subdivisions. This is not necessary.	
Please choose this option!!			
This is the best option. It would be great if there was a parking lot. The road is too narrow for cars to park on.			
Please don't ruin it with housing. A park with walking trails. Coasting in the winter			
Yes	Maybe	No	Housing is way overpriced. We need to preserve more wildlife, plants,trees. All for keeping it as a park.
Preferred choice			
	I like the idea of housing on-site. It should be designated for a coop or other multi use, mixed age and income housing. This land SHOULD NOT be sold off to just any developer.		
I vote 100% park.			
Think it will make a beautiful community park...			
		Proper use for this property. Who wants to walk in dog "CRAP"	
Best option. Yes!!	No housing. Preserve the natural environment with a very commonly used green space. I believe housing would take away from the atmosphere of the area.	No housing. Preserve the natural environment with a very commonly used green space. I believe housing would take away from the atmosphere of the area.	I think it would be a great idea to be able to have a maintained green space that has a rich history of childhood experiences. To be able to bring future generations to this site as a true outdoor adventure would be phenomenal. Preserving this outdoor space without adding housing would be the most beneficial decision for many.

Option 1 is my choice. This way it benefits all not just those who can afford to buy a spot for a house. Just my thoughts.			
Would love to keep the green space. Good sledding hill, cross country skiing trails, etc. This would be my first choice for this space.			
It's a great option for a park and something that's needed at that end, as long as people don't trash it. It's great for sledding, walking, and exploring.			
Best option the community and surrounding residents. This space has been used exclusively as a park for the past 10+ years. Residents are use to walking their dogs, hiking, biking, and using this space as a park. Housing would be disruptive to this			
It should be a park. Bring back the sense of community that existed before they tore it down. No need to put in more housing ppl can't afford			
A park would be beautiful in that area			
Add a dog park and playground. This area is safe enough to not need housing in the playground. Add a small parking lot	Add a tree separation between the residential area and the park space. Otherwise it will feel like the park belongs to those houses. Add a small parking lot.	Too many houses and ruins the space. This area will be overtaken by the people who live in these new houses and not for the community	
	Option 2 looks good to me . I there is a need for housing this could work I think. I would like to have the park with the walking trail. Would the trail going up along the brook be included ? What type of housing is this? Attached housing or single family dwelling?		
	Best option . If you have lived in the area as long as I have, you would know of the play ground that was in close proximity to this property. And we are still paying taxes for something no one uses. I think it would be a good opportunity to put some tax base back into our community. Oh and don't forget the ball fields that we had. Cheese plant just up the road across from Cameron farm equipment. To turn it all into a park would be an irrispinciple miss use of this property. If you cannot afford enough property to walk you dog on don't put it off on the members of the community to pay for your misscommings. Thank You Sam
